tourism can be a challenging subject for students because it is both dynamic and susceptible to economic turbulence and shifts in trends tourism a modern synthesis is an essential textbook for tourism students seeking a clear and comprehensive introduction to their studies that addresses these challenges the authors apply a business approach to the subject reflecting developments in the teaching and content of university courses and the text covers both key principles and contemporary themes and issues at a global scale among the new features and topics included in this fifth edition are new and fully updated case studies to reflect current trends and emerging markets including africa and asia up to date content on disruptive technologies such as airbnb low cost airlines the e travel revolution and future developments current debates in sustainable tourism including the anti tourism movement plastic use and the

sustainable development goals new content on evolving topics such as future employment human resource management in tourism and generational marketing fully updated statistics and data a brand new companion website including an instructor s manual supplementary case studies weblinks multiple choice questions and powerpoint slides this is the ideal guide to tourism for students across all levels serving as a point of reference throughout a programme of study

evolution cognition and the history of religion a new synthesis comprises 41 chapters that push for a new way of conducting the study of religion thereby transforming the discipline into a genuine science of religion the recent resurgence of evolutionary approaches on culture and the increasing acknowledgement in the natural and social sciences of culture s and religion s evolutionary importance calls for a novel epistemological and theoretical framework for studying these two areas the chapters explore how a new scholarly synthesis founded on the triadic space constituted by evolution cognition cultural and ecological environment may develop different perspectives and themes relating to this overarching topic are taken up with a main focus on either evolution cognition and or the history of religion

this book examines sociobiology s validity and significance using the sociobiological theory of the evolution of mating and parenting as an example it identifies and discusses the array of factors that determine sociobiology s effort to become a science providing a rare balanced account more critical than that of its advocates and more constructive than that of its critics it sees a role for sociobiology in changing the way we understand the goals of evolutionary biology the proper way to evaluate emerging sciences and the deep structure of scientific theories the book s premise is that evolutionary biology would not be complete if it did not explain evolutionarily significant social facts about nonhumans and humans it proposes that explanations should be evaluated in terms of their basis in underlying theories research programs and conceptual frameworks

the updated textbook is intended to serve as an advanced and detailed treatment of the evolution of the subject of stratigraphy from its disparate beginnings as separate studies of sedimentology lithostratigraphy chronostratigraphy etc into a modern integrated discipline in which all components are necessary there is a historical introduction which now includes information about the timeline of the evolution of the components of modern stratigraphy the elements of the various components facies analysis sequence stratigraphy mapping methods chronostratigraphic methods etc are outlined and a chapter discussing the modern synthesis is included near the end of the book which closes with a discussion of future research trends in the study of time as preserved in the stratigraphic record

this innovative and thought provoking book integrates both new authored material and reprints of existing literature that together provide a compelling narrative that reveals

the fatally flawed science associated with genetic reductionist accounts of human behavior and development through an interdisciplinary lens it illuminates the dynamic nature of human development empowering readers to question established notions and embrace the complexity of our potential across the book the work of top tier scientists from developmental comparative educational and biological science illuminates theory and research converging on the conclusion that the multiple egregiously flawed work of genetic reductionists should be expunged from research pertinent to human development the book challenges the prevailing reductionist narratives and their application to social policies programs and uses in media theoretically based and empirically rigorous this multidisciplinary approach to human development will shine a light on the inequities in individuals or groups that suggest that specific genes do not enable them to succeed in life the heredity hoax invites graduate programs and advanced undergraduate courses on human development human potential epigenetics and more to delve into the intricate interplay between genes environment and personal growth this will also serve as an unimpeachable source of evidence for researchers educators and social policymakers

in this thought provoking book denis noble formulates the theory of biological relativity emphasising that living organisms operate at multiple levels of complexity and must therefore be analysed from a multi scale relativistic perspective noble explains that all biological processes operate by means of molecular cellular and organismal networks the interactive nature of these fundamental processes is at the core of biological relativity and as such challenges simplified molecular reductionism noble shows that such an integrative view emerges as the necessary consequence of the rigorous application of mathematics to biology drawing on his pioneering work in the mathematical physics of biology he shows that what emerges is a deeply humane picture of the role of the organism in constraining its chemistry including its genes to serve the organism as a whole especially in the interaction with its social environment this humanistic holistic approach challenges the common gene centred view held by many in modern biology and culture

tourism a modern synthesis is an accessible core textbook for tourism focusing on the development and management of tourism in an international context a strong business and management theme pervades the book reflecting developments in the teaching and content of modern courses the book is based around the principles of management and includes case studies emphasising this theme it can be used as a one semester text but its coverage of a broad range of subjects make it a useful resource throughout the three years of a degree course

biology was forged into a single coherent science only within living memory in this volume the thinkers responsible for the modern synthesis of evolutionary biology and

genetics come together to analyze that remarkable event in a new preface ernst mayr calls attention to the fact that scientists in different biological disciplines varied considerably in their degree of acceptance of darwin s theories mayr shows us that these differences were played out in four separate periods 1859 to 1899 1900 to 1915 1916 to 1936 and 1937 to 1947 he thus enables us to understand fully why the synthesis was necessary and why darwin s original theory that evolutionary change is due to the combination of variation and selection is as solid at the end of the twentieth century as it was in 1859
